ACCESS SERVICE

Digital Subscriber Line Services provide transmission services over local exchange service copper facilities that can be used for simultaneous voice and data communications. Service is provided, where available, between customers designated premises and designated Company Serving Wire Centers. (N)

9.1 Asymmetric Digital Subscriber Line Service9.1.1 General

Asymmetric Digital Subscriber Line (ADSL) Service enables data generated by the customer's equipment to be transported to a DSL Service Connection Point using local exchange service facilities. A DSL Service Connection Point is an interconnection point designated by the Company that aggregates data traffic from and to Company ADSL Serving Wire Centers (SWCs). The customer for ADSL Service is the subscriber of the Company's local exchange service.

9.1.2 Limitations

ADSL Service is available at selected upstream speeds from 64 kbps to 768 kbps (i.e., from the customer's equipment up to the DSL Service Connection Point) and a maximum downstream speed of 1.544 Mbps (from the DSL Service Connection Point down to the customer's equipment). These peak speeds are not guaranteed by the Company due to factors that may affect the actual speeds delivered, including loop distance from the Company Serving Wire Center, condition of the facilities, and limitations in the telecommunications service provider's network design. The Company does not provide customer premises equipment (CPE) in conjunction with the ADSL Service offering.

The data rates (speeds) apply to the local loop segment of the facility provided by the Company. The Company cannot guarantee effective throughput beyond its copper facility (the ADSL circuit), for example, at an Internet Service Provider's server or at a Local Area Network (LAN) server.

9.1.3 Obligations of the Customer

In addition to the regulations described in other sections of this tariff, the following provisions apply to ADSL Service:

- (A) The customer must subscribe to local exchange service from the Company pursuant to the Company's general and/or local exchange service tariffs. The Company will automatically disconnect ADSL Service when the associated local exchange service is disconnected for any reason.
- (B) The customer is responsible for providing the Company with the necessary information to provision ADSL Service (e.g., customer name, telephone number and premises address; billing name and address when different from the customer name and premises address; customer contact name and telephone number and the contact name and telephone number of the telecommunications service provider with which the customer's ADSL Service will interconnect).

ACCESS SERVICE

- (C) The customer is responsible for providing and maintaining all required customer provided equipment (CPE), which is compatible with ADSL Service.

9.1.4 Rate Regulations

This section contains the regulations governing the rates and charges that apply for ADSL Service. The rates for ADSL Service will be billed to the subscriber of the local exchange service.

(A) Minimum Period

The minimum period for which ADSL Service is provided to a customer and for which charges are applicable is one month.

(B) Moves

A move involves a change in the physical location of one of the following:

- The Point of Termination at the customer designated premises
- The customer designated premises

(C) Temporary Suspension of Service

When an ADSL Service customer temporarily suspends its local exchange service, the ADSL Service and one-half of the ADSL Line Charge monthly rate will be temporarily suspended for the time period that the associated local exchange service is suspended.

(D) Rate Categories

There are two types of rates and charges applicable to ADSL Service. These are a monthly rate and a nonrecurring charge.

The monthly rate applies each month or fraction thereof for each local exchange service line equipped with ADSL Service.

A nonrecurring charge applies per local exchange service line for the installation of ADSL Service.

Rates and charges for ADSL Service are set forth at Section 17.4.8 (other services) (N)

ACCESS SERVICE

17. Rates and Charges17.4 Other Services (Continued)17.4.7 Specialized Service or Arrangements

Specialized Service or Arrangements are provided on an individual case basis as set forth following:

17.4.8 Asymmetric Digital Subscriber Line Access Service (ADSL)

(N)

(A) ADSL may be ordered on a month-to-month basis or a one-year minimum service period.

(B) ADSL is offered in several configurations:

- ! Basic ADSL (256 kbps downstream/64 kbps upstream)
- ! Basic Plus ADSL (384 kbps downstream/128 kbps upstream)
- ! Silver Package ADSL (384 kbps downstream/384 kbps upstream)
- ! Gold Package ADSL (1.5 mbps downstream/512 kbps upstream)

	Month To	Month	12 Month	Nonrecurring
<u>Residential ADSL Options</u>	<u>Rate</u>	<u>Rate</u>		<u>Charge</u>
Basic 256/64 kbps plan	\$50.95	\$35.95		\$60.00
Basic Plus 384/128 kbps plan	\$57.95	\$42.95		\$60.00
Silver 384/384 kbps plan	\$99.95	\$79.95		\$60.00
Gold 1.5mbps/512 kbps plan	\$229.95	\$199.95		\$60.00

	Month To	Month	12 Month	Nonrecurring
<u>Business ADSL Options</u>	<u>Rate</u>	<u>Rate</u>		<u>Charge</u>
Basic 256/64 kbps plan	\$80.95	\$65.95		\$60.00
Basic Plus 384/128 kbps plan	\$87.95	\$72.95		\$60.00
Silver 384/384 kbps plan	\$129.95	\$109.95		\$60.00
Gold 1.5mbps/512 kbps plan	\$259.95	\$229.95		\$60.00

(The data rates (speeds) apply to the local loop segment of the facility provided by the Company. The Company cannot guarantee effective throughput beyond its copper facility (the ADSL circuit), for example, at an Internet Service Provider=s server or at a Local Area Network (LAN) server.)
